

VueCloud

VueCloud is a cloud-based “Platform as a Service” (PaaS) that includes all of Vuemix’s unique technologies to easily produce media-rich websites and apps.

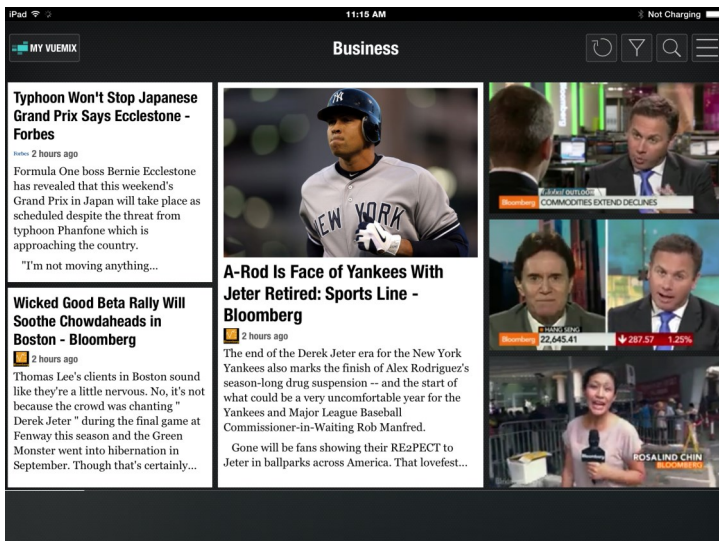

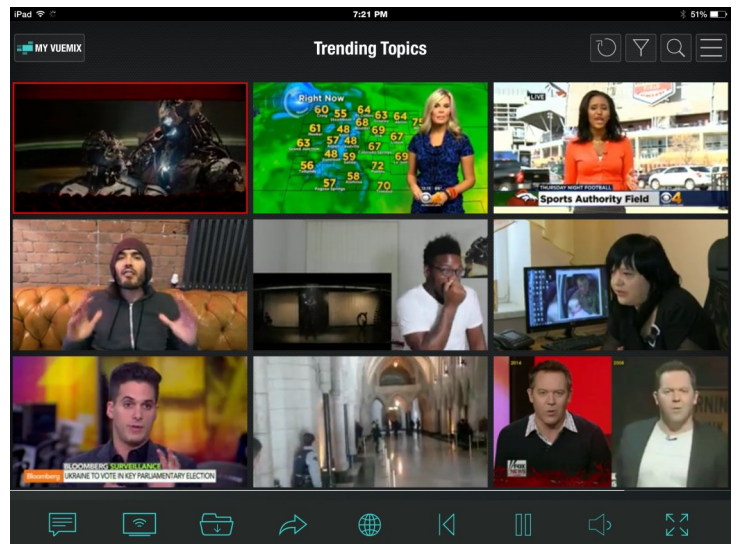

- **Easy to upload content**
 - Simply transfer content (video, pictures, or text) to VueCloud via a web-based GUI or in bulk using APIs
 - Easily include metadata like categories, descriptions, keywords, dates, etc.
 - Select or create your preferred color schemes and upload your branding graphics
- **Automatic creation of apps and web pages**
 - No video pre-processing required
 - No need to laboriously layout your content
 - Attractive presentation of content, with text, videos, and photos interwoven in a page format
 - Multiple video clips play simultaneously on each page to attract and engage users
- **Devices and features**
 - Support for clients including iOS (iPhones and iPads), Android tablets and phones, as well as Windows and Mac-based browsers.
 - Users can search content easily
 - Social sharing to all the popular sites

VueCloud

VueCloud has an easy-to-use web interface to upload text and media files.

VueCloud creates dynamic pages, ranging from all video...

...to pages with a mix of videos, text, and photos – all in a variety of eye-catching layouts.
