

VueContent

VueContent is an efficient cloud based platform to store and manage content. The highly-scalable platform has an intelligent cache and a streaming interface.

Intelligent Cache

- Arbitrary, multi-hierarchical, and distributed
- Supports SSD, DRAM, and disk (spindle)
- Automatic content discovery (simplifies management)
- Linear and VOD content
- All-active or active-passive redundancy and failover

Streaming Interface

- Efficient multiplexing of connections to the streaming server
- Extremely low latency
